PROFESSIONAL SUMMARY

Backend-focused Software Engineer and Informatics Engineering graduate (GPA 3.96/4.00) with enterprise experience at Bank Syariah Indonesia, building HR information systems used by 20,000+ users with PHP, Spring Boot, Next.js, and MySQL/Oracle. Skilled in REST API development, database optimization, and Python automation. Seeking a Backend or Full-Stack Developer role to build reliable, scalable software.

TECHNICAL SKILLS

Programming Languages: Java, PHP, Python, JavaScript, TypeScript
Backend: Spring Boot, Flask, Laravel, Django, Express.js (Node.js)
Frontend: React.js, Next.js, HTML5, CSS3, Tailwind CSS, Bootstrap 5
Database: MySQL, PostgreSQL, Oracle, SQLite
API & Architecture: RESTful API Design, MVC Architecture
Tools & DevOps: Git/GitHub, Docker, Postman
Data & AI: Pandas, scikit-learn, NLP (TF-IDF, Naive Bayes, KNN), Neural Network (ANN)
Other: Technical Documentation, System Analysis

EDUCATION

Universitas Budi Luhur

September 2022 – February 2026

Bachelor of Informatics Engineering (Sarjana Teknik Informatika)

GPA: 3.96 / 4.00 | Programming Expert

Thesis: PENGGUNAAN ALGORITMA MULTINOMIAL NAÏVE BAYES DAN KNN UNTUK KLASIFIKASI INTENT UNTUK CHATBOT LAYANAN KAMPUS UNIVERSITAS BUDI LUHUR

WORK EXPERIENCE

Human Capital Technology & Information Staff (BIBIT Internship Program)

April 2026 – Present

Bank Syariah Indonesia

- Engineered and maintained SIKAD, an enterprise Human Capital Information System serving 20,000+ users, and contributed to SIPP, a supporting administrative application, delivering reliable systems for HR and administrative operations across Bank Syariah Indonesia.
- Collaborated with cross-functional HR teams to analyze requirements, troubleshoot production issues, and deliver enhancements for both applications.
- Automated personalized HR notifications for 16,000+ employees by building a Python-based Microsoft Teams Automation Bot for HC Connect, eliminating manual communication effort.
- Cleansed, validated, and migrated 50,000+ HR records using Python and Pandas to support data accuracy and system migration.
- Built a Python PDF Compressor to streamline internal document handling.

Coding & Robotics Teacher (Part-Time)

December 2025 – July 2026

Codero Education

- Taught web development (HTML, CSS, JavaScript) and Python programming to middle and high school students through project-based learning.
- Designed structured curricula, practical modules, and assessment rubrics aligned with each age group's learning objectives.

Web Developer (Project-Based Independent Study)

September 2024 – December 2024

Educourse.id (Specialist Education Platform)

- Designed and developed RPLearn, an e-learning platform, with end-to-end ownership of the frontend (Bootstrap 5, JavaScript) and backend (Django).
- Implemented user authentication, course management, and content delivery modules according to detailed technical specifications.

- Participated in agile sprints (planning, code reviews, iterative development) and wrote technical documentation to support long-term maintainability.

PROJECT EXPERIENCE

SIKAD (Sistem Informasi Kriya & Alih Daya)

April 2026 – Present

Bank Syariah Indonesia

- Built, enhanced, and maintained HR modules as the sole developer for the HR domain, covering Business Trip, Payroll, Overtime, Attendance, Leave, Registration, Manpower Planning, Overtime Extra, Dashboards, Reporting, and other features, including those serving 11,500+ outsourced employees (TAD, BIBIT, Kriya).
- Designed MySQL tables, indexes, stored procedures, and scheduled events, and tuned slow queries to improve application performance and transaction integrity.

SIPP (Sistem Informasi Pendaftaran dan Penghargaan)

June 2026 – Present

Bank Syariah Indonesia

- Contributed to a supporting application built alongside BSI's core HR systems to quickly fulfill administrative needs for registration and award processes.
- Developed backend REST APIs with Spring Boot integrated with Oracle Database, and built frontend modules with Next.js.
- Implemented real-time push notifications with WebSocket to deliver instant updates on new memos to users.
- Integrated automated email delivery to distribute official memo information to target users.
- Implemented role-based access control to separate permissions across administrative user roles.

University Chatbot – NLP Intent Classification

November 2025 – January 2026

Universitas Budi Luhur

- Developed a full-stack chatbot application using Python Flask (REST API) and React.js, enabling real-time intent classification across 43 user intent categories.
- Engineered a complete NLP preprocessing pipeline (tokenization, stemming via Sastrawi, TF-IDF feature extraction) and trained Multinomial Naive Bayes and K-Nearest Neighbor classification models.

Mining Product Sales Prediction Dashboard

December 2024 – February 2025

PT Central Pacific Development

- Developed a full-stack Django dashboard for uploading, managing, and analyzing Excel-based sales data, with automated monthly aggregation to support time-series forecasting.
- Integrated a Backpropagation Artificial Neural Network (ANN) forecasting model with interactive visualizations of training loss and predicted-versus-actual sales performance.

LEADERSHIP & ORGANIZATIONAL EXPERIENCE

President – Gema Luhur Choir

March 2024 – May 2025

Universitas Budi Luhur

- Directed organizational strategy, rehearsal scheduling, and stakeholder communications for a 40+ member performing ensemble.

President – University General Election Commission (KPU)

December 2023 – February 2024

Universitas Budi Luhur

- Oversaw a team of 35 coordinators in executing a university-wide democratic election adhering to the Luber Jurdil principles, managed all electoral operations from candidate registration through to official result announcement.

CERTIFICATIONS

- Certificate of Basic Computer Algorithm Competency – Universitas Budi Luhur
- Workshop Certificate: SQL Map on Kali Linux for Database Security – Universitas Budi Luhur
- Web Developer and Platform Certificate – Educourse.id
- Python Programming Course Completion Certificate - GeeksForGeeks
- Javascript Intermediate Course Completion - Skilvul
- AI Productivity and API Integration for Developers – Hacktiv8
- Programming Fundamental – Digital Talent Academy
- SQL (Intermediate) Certificate – HackerRank
- Software Engineer Intern - HackerRank
